Subject: FW: PFAS site list
Attachments: NPL PFAS sites 022118.xlsx

Joe,

OLEM has developed a PFAS Site tracking spreadsheet that they've asked the Regions to populate and keep updated (see an off-line version attached). The purpose is to use this to respond to continuing requests from Congress, the public, and others for general information on PFAS at our sites. They've suggested that we include RCRA sites as well, which is why I'm reaching out to you. Are you aware of any RCRA sites dealing with PFAS, i.e. sites where it has been sampled for and detected, where it was sampled for and not detected, or where it potentially may be found but hasn't been sampled yet. I could then reach out the appropriate people for information. Alternatively, if you have one person who is a PFAS point of contact I could arrange to get them access to OLEM's Sharepoint version of the spreadsheet to directly input the information from LCD.

If you want to talk about this let me know. Thanks.

Subject: PFAS site list

Thank you for agreeing (or being volunteered) to be a regional point of contact to help keep the PFAS site list current. This document can only be accessed by a limited set of people. If we need to add a POC, please let me know, so I can add them. The link below will take you to an Excel workbook on the PFAS Site Information SharePoint. There are three tabs. "Detected PFAS sites" are sites where PFAS has been definitively detected. "Potential PFAS sites" are sites which are being investigated for PFAS. "Non detected PFAS sites" are sites where the site has been sampled for PFAS and determined to not be present. We will now be using this spreadsheet for tracking all sites where we are aware of PFAS releases. This includes both NPL and Non-NPL sites as well as Federal Facility sites, private sites and other sites including but not limited to RCRA etc. Note, that currently we are only tracking private NPL sites, but FFRRO is tracking other types of federal facilities.

Please fill in any missing information and please check the information that is present. Note that there are two sites that are highlighted and listed on both the detected and potential site lists because we are unsure if they are either detected or potential. Please correct the information and delete off of whichever list they do not belong on. If there is additional information that you think it would be beneficial for us to track, please let us know.

Let John or I know if you have any questions. Thanks again for your help.
